Surgical Instruments

SubMedOrtho – Delivering Precision Surgical Instruments Worldwide

SubMedOrtho is a professional manufacturer and exporter of high-quality surgical instruments. With **10 years** of local manufacturing experience and **2 years** of experience in the international market, we have built a strong reputation for quality, reliability and customer satisfaction worldwide.

BACKGROUND

SubMedOrtho is proudly based in Sialkot, Pakistan – the world's leading city for surgical instruments manufacturing. More than 95% of Pakistan's surgical instruments are produced in Sialkot and exported to over 150 countries around the globe. Our skilled craftsmanship combined with modern technology allows us to deliver premium quality instruments to healthcare professionals worldwide.

OUR CHALLENGE

Healthcare professionals demand reliable, durable and precision-engineered surgical instruments with competitive pricing and fast delivery. Our goal was to build a system that ensures consistent quality, wide product range and dependable service for global customers.

OUR SOLUTION

We manufacture a complete range of surgical instruments for all major specialties using high grade stainless steel and advanced manufacturing techniques. Each instrument is carefully inspected to meet international quality standards.

We Manufacture For:

- Orthopedic Surgery
- General Surgery
- ENT (Ear, Nose & Throat)
- Dental Surgery
- Veterinary Surgery
- Gynecology
- Neurosurgery
- Plastic Surgery
- Cardiovascular Surgery
- Laparoscopic Instruments
- Micro Instruments
- And Many More

We also offer OEM & Private Label services as per customer requirements.

“ Our mission is to provide high quality surgical instruments that healthcare professionals can trust. Through precision manufacturing, strict quality standards and excellent customer service, SubMedOrtho is committed to improving healthcare worldwide. ”

OUR EXPERIENCE

10+

Years of
Local Experience

2+

An Overview On

Forceps Jaw Types

You will see that forceps in our catalogue will have either a traditional serrated jaw or a different design which is known as atraumatic (or non-traumatic).

Traditional Serrated Jaw

The traditional serrated jaw is generally more robust and used on forceps where the areas are not as delicate.

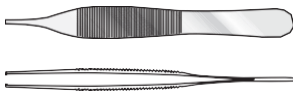

Atraumatic Jaw

Atraumatic jaws will be mainly found in delicate surgery areas such as vascular and cardiothoracic. The design is such, that the surface area gripped is reduced, ensuring less trauma without the loss of grip.

Spring Forceps

Guide for Gold and Black Bows

It's important to know the difference for the intended use of each scissor:

2 Gold Bows
Tungsten carbide insert or padding for a scissor

2 Black Bows
Supercut edge

1 Black and 1 Gold Bow
Supercut tungsten carbide

1 Black Bow (left ring)
Left-handed instrument

Supercut Operating Scissors

Code	Description
SM-GI-MNH	178mm long

Choosing the most suitable needle size

Our tungsten carbide inserts are available in a variety of styles. Choosing the most suitable needle size for each procedure helps give the surgeon maximum grip and control.

Coarse 0.65mm

For powerful needle holder patterns and wire twisters. Maximum holding capabilities for heavy needles or wire.

Standard 0.5mm

Used, for example, in Mayo-Hegar, Mathieu Needle Holders. For needles 3-0 and larger.

Fine 0.4mm

For delicate needle holders such as Crile-Wood and DeBakey. For needles and sutures between 4-0 and 6-0.

Micro 0.2-0.3mm

For micro needle holders such as Castroviejo, Microvascular and Mini-Ryder. For delicate needles and sutures between 7-0 and 10-0.

Smooth

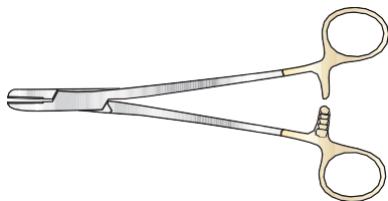

Smooth tungsten carbide surface reduces damage to delicate needles and suture of 6-0 and finer.

Berry Needle Holder/Wire Twister

Endoscope Re-fiber

Surgical Holdings manufacture their own fibre bundles in house. We cover small and larger diameter scopes and only use high quality German fibre optic material and stainless steel tubing.

Quality components, globally sourced:

- ✓ Medical grade stainless steel tubing
- ✓ German engineered new glass fibre
- ✓ New fibre cone as standard
- ✓ New solderable sapphire distal window
- ✓ New light post colour ring
- ✓ New objective in 95% of cases
- ✓ Replacement 'O' ring to prevent leakage

Silicone Matting & Sterilizing Baskets

Silicone Matting

Medical grade for storage, sterilisation and transportation of instruments.

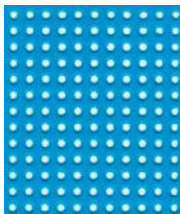

Cushion, protect, and organise delicate surgical instruments during storage, transportation, and sterilisation. Perforations allow for ventilation during the sterilisation process. The silicone mat can be cut to fit any size container.

502mm long x 242mm wide
7mm holes, 10mm between holes

Code

SM-GI-SM-1
